

RFP #12-17

Summary

Frederick County, Maryland (hereinafter referred to as “the County”) is seeking proposals from qualified offerors to provide all equipment and services necessary to implement and maintain a comprehensive electronic monitoring program (EMP) for the County’s detention and correctional facilities. The primary end-user department is the Adult Detention Center/Work Release Department. The County desires an electronic monitoring system that uses global positional satellite (GPS) technology and has the ability to identify the offender, monitor his/her presence, and detect unauthorized absences at a specific location. It is the intention of the Sheriff’s Office to obtain a service provider that offers dependable, reliable service, which is responsive to customer needs and offers a support package.
